

McClure Telephone Company dba M2X Communications

Network Management Practices Policy Disclosure

Pursuant to the Federal Communications Commission's newly enacted Open Internet Rules found in Part 8 of Title 47 of the Code of Federal Regulations, M2X COMMUNICATIONS policies regarding network management practices, performance characteristics, and commercial terms are provided in entirety so that M2X COMMUNICATIONS's current customers, prospective customers, third-party content providers and other interested parties can make informed choices regarding the broadband Internet transport services offered by M2X COMMUNICATIONS, and the extent M2X COMMUNICATIONS's network management practices may affect those services.

Network Management Practices

M2X COMMUNICATIONS utilizes reasonable network management practices tailored to achieve legitimate network management purposes. By engaging in reasonable and responsible network management, M2X COMMUNICATIONS prevents its customers from being subjected to the negative effects of spam, viruses, security attacks and other risks that threaten to degrade service. The network management practices employed by M2X COMMUNICATIONS are consistent with industry standards.

During routine meetings, M2X COMMUNICATIONS engineers review all proposed changes to the network infrastructure to ensure that network availability will not be compromised and to confirm that networking standards and best practices are followed. Emergency network change requests and network maintenance proposals undergo a strict network design review to ensure the integrity of the network and to preserve the neutral network environment.

Congestion Management

M2X COMMUNICATIONS does not employ any congestion management tools and/or software on network traffic. M2X COMMUNICATIONS maintains sufficient bandwidth to service its directly peered customers.

M2X COMMUNICATIONS employs a standard best effort Internet delivery policy to ensure that any organization, institution or entity connected, directly or indirectly, to M2X COMMUNICATIONS's backbone network may exercise choice in lawful Internet content, web-based application and use of M2X COMMUNICATIONS or competitor service, including any device which is not harmful to the network.

For organizations utilizing M2X COMMUNICATIONS hosted mail service, M2X COMMUNICATIONS may employ filtering for SPAM and viruses on email sent to the subscribing organizations.

Network Openness and Fair Use

M2X COMMUNICATIONS actively engages and encourages open settlement-free peering with providers and operators. M2X COMMUNICATIONS's network management policies prohibit the discrimination of legitimate or legal use of network capacity bandwidth by application, source or use of the network. M2X COMMUNICATIONS Network does not limit or impose any limitations on users at subscribing organizations to lawfully possess, use, or distribute Internet content.

All of the preceding is subject to the needs of law enforcement. M2X COMMUNICATIONS does not favor any lawful Internet applications or content over others, and is committed to enabling competition among network providers, application and service providers, and content providers.
